

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A key telephone set comprising:
 - a telephone main body comprising a handset placing unit;
 - an interchangeable dial button unit attached to said telephone main body;
 - an interchangeable line button unit attached to said telephone main body; and
 - an interchangeable display unit attached to said telephone main body; wherein
 - said telephone main body, said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are structured so that said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are detachable from said telephone body without disassembly of said telephone main body.
2. (original): A key telephone set as claimed in Claim 1, wherein said interchangeable display unit comprises a liquid crystal display panel.
3. (original): A key telephone set as claimed in Claim 1, wherein said interchangeable display unit comprises a dummy.

4. (original): A key telephone set as claimed in Claim 1, wherein said interchangeable line button unit comprises a plurality of line selection buttons and a plurality of light emitting diodes corresponding to said line selection buttons.

5. (original): A key telephone set as claimed in Claim 4, wherein said telephone main body is capable of being attached with another interchangeable line button unit different in number of said line selection buttons from said interchangeable line button unit.

6. (original): A key telephone set as claimed in Claim 1, wherein said interchangeable line button unit comprises a plurality of line selection buttons and a liquid crystal display panel.

7. (original): A key telephone set as claimed in Claim 6, wherein said telephone main body is capable of being attached with another interchangeable line button unit different in number of said line selection buttons from said interchangeable line button.

8. (original): A key telephone set as claimed in Claim 1, wherein said telephone main body is capable of being attached with another interchangeable dial unit different in specification from said interchangeable dial unit.

9. (original): A key telephone set as claimed in Claim 1, wherein said interchangeable line button unit is attached to said telephone main body with a first sliding attachment mechanism; and wherein
said interchangeable display unit is attached to said interchangeable line button unit with a second sliding attachment mechanism and thereby said interchangeable display unit is attached to said telephone main body through said interchangeable line button unit.

10. (original): A key telephone set as claimed in Claim 9, wherein said first sliding attachment mechanism has a sliding direction parallel to that of said second sliding attaching mechanism.

11. (currently amended): A key telephone system comprising:
a main device; and
a telephone set connected to said main device; wherein
said key telephone set comprises a telephone main body comprising a handset placing unit, an interchangeable dial button unit attached to said telephone main body, an interchangeable line button unit attached to said telephone main body, and an interchangeable display unit attached to said telephone main body; and wherein
said telephone main body, said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are structured so that said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are

detachable from said telephone body from a top surface side of said telephone main body without disassembly of said telephone main body.

12. (previously presented): A key telephone set as claimed in Claim 1, wherein said interchangeable line button unit is attached to said telephone main body with a first sliding attachment mechanism.

13. (previously presented): A key telephone set as claimed in Claim 12, wherein said interchangeable display unit is attached to said interchangeable line button unit with a second sliding attachment mechanism and thereby said interchangeable display unit is attached to said telephone main body through said interchangeable line button unit.

14. (previously presented): A key telephone set as claimed in Claim 1, wherein said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are independent of each other.

15. (previously presented): A key telephone set as claimed in Claim 1, wherein said interchangeable dial button unit, said interchangeable line button unit and said interchangeable display unit are detachable from said telephone main body from a top surface side of said telephone main body.
